

# Glass Fabrication

## for Commercial & Residential Applications

Glaz-Tech Industries has established itself as an ideal and reliable source for custom fabrication in both commercial and residential applications.

Glaz-Tech's state-of-the-art capabilities can withstand complex work loads and projects providing unique results within your specifications. Glaz-Tech offers favorable and competitive lead times for projects requiring specific energy efficient values, tempering & safety applications, complete shower enclosures with hardware or something as simple as a custom fabricated glass table top.

### Applications

- Heavy Float Glass
- Mirrors
- Shower Enclosures
- Interior Partitions
- Furniture Applications
- Showerdoors
- Storefronts
- Railings
- Display Cases
- Appliances
- Residential Doors
- Commercial Doors

### Fabrication Solutions

- Insulating Units
- Heat Strength
- Tempering
- Laminated Units
- Spandrel
- Crafted Edgework
- Precision Cutting

### Maintaining Standards for

- Energy Efficiency
- Strength & Security
- Fire Safety
- Aesthetics

# Solutions for Hot & Cold Temperatures

## Insulated Glass - Energy Efficient Options

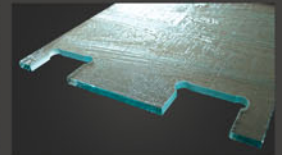

Glaz-Tech Industries fabricates customized levels of performance for insulated units by incorporating a broad range of hard or soft low-e coatings. Coatings can be fabricated for both commercial and residential platforms while configuring performance values with standard, low-e, and/or tinted glass products. Visit [glaztech.com](http://glaztech.com) for additional information on today's energy efficient glass and the significant impact that fabricated low-e insulated units may have on your projects.

Hard or Soft Coat Low-E

## WaterJet Fabrication

Glass fabrication methods have gotten more complex with new design requirements from architects, CAD developers, designers and project managers. Glaz-Tech is a glass fabricator that provides fast, reliable, and accuracy through state-of-the-art cutting system technology. Its versatility, function, and efficiency is all managed through CAD operating software which in turn delivers high quality and precisely fabricated glass product. Essential for shower doors, shower enclosures, entrance doors and systems, desktops, mirrors, glass rails, door panels and more.

## Crafted Edgework

Glaz-Tech Industries offers 4 standard ways to stylize the edge of your glass. Choose pencil polish, flat polish, beveled or a mitre edge to take full advantage of a complete fabricated product. If you require mirror ranging from a 1/2" inch bevel to a 2" inch bevel or table tops with a consistent and beautiful pencil polish then Glaz-Tech Industries has those capabilities. Take advantage of professional glass edgework and give your mirror or glass that beautiful final touch.

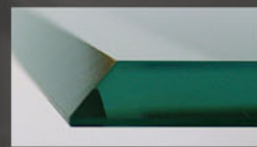

**Recommended Applications :** Mirror, table tops, shower enclosures, bathroom mirrors, glass rails, door entrances, door panels, displays, shelves and beveled mirror strips.

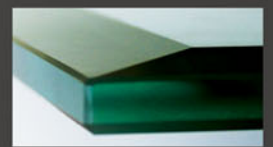

Pencil Polish

Flat Polish

Mitre Edge

Beveled Edge

## Availability

Glaz-Tech Industries strives in offering each of its locations innovative glass products as well as fabricating options. **Please contact your local office as these options may vary.** Glaz-Tech is committed in accommodating your project requirements and will use its resources to assist you in completing your projects in a consistent and reasonable time frame.
