

DURABLE & CLEAR SHOWER ENCLOSURES
 ENHANCED PROTECTIVE COATINGS FOR SHOWER ENCLOSURES.

A Durable & Protective Coating for Shower Enclosures

Glaz-Tech Industries offers an efficient glass coating that is cost effective and exceeds today's standards in maintaining a protected and clean shower enclosure. Glaz-Shield chemically bonds to glass and cross links with itself at the molecular level for maximum protection so that the glass remains clear and bright while requiring less maintenance. Its advanced coating protects surfaces from water spots, rust and mineral deposits which in time may discolor and permanently damage a once beautiful shower enclosure. Glaz-Shield's treated process creates a clean surface and does not require special or expensive cleaning products. Order Glaz-Shield on any shower enclosure glass and take full advantage of a product that is durable, clean and proven effective product in the shower enclosure industry.

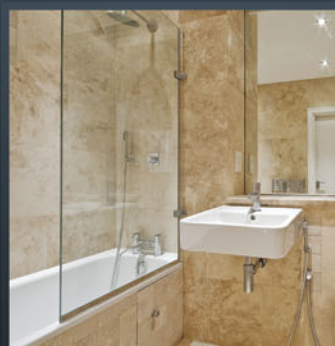

Untreated Glass

Treated Glass

Glaz-Shield's protective coating is a leader in the shower enclosure industry that is proven against the damaging effects of lime scale, soap, scum, mineral deposits and rust stains.

Glaz-Shield Advanced Protection Features

- Can be applied to any thickness or substrate.
- Stays cleaner and sparkling.
- Resists stains & discoloration.
- Requires less cleaning.
- Does not require expensive specialty cleaners or maintenance programs.
- Will never crack, chip, peel or discolor.
- Glaz-Shield is a state-of-the-art chemical bonding process for durability that lasts.
- Minimal maintenance still required to preserve the longevity of Glaz-Shield glass coating.
- Long lasting with a minimum guarantee of 10 years.

Keep your shower durable and looking like new with less maintenance and at a great price.

Glaz-Shield is a Product of **VINDICO**

*Any generic safe spray cleaners such as Glass Plus / Windex type products.

What Not to Use

Avoid using products containing high concentrations of alkalis, acids & abrasives. Heavy duty or commercial cleaners are not necessary and can cause damage to glass coating, metal finishes used on shower enclosures and even brackets/hinges. Sharp instruments such as knives, razor blades or screw drivers can scratch or damage glass.

WATERJET & GLAZ-TECH FABRICATION

There are standards and then there are custom applications. Glaz-Tech Industries takes strides in providing basic and complex fabrication options. Whether you are inquiring about a specifically designed pattern, Glaz-Tech's state-of-the-art fabrication line and WaterJet platform gives you the flexibility to design accordingly. Basic or custom fabricated glass, GTI is the ideal source for a wide range of reliable glass applications and hardware.
