

**COMPLIMENTARY PERFORMANCES**

Glaz-Tech Industries offers an expansive line of tinted and reflective glass products to enhance thermal efficiency while creating a visually pleasing exterior. The wide range of tints and reflected glass applications allows your projects to remain flexible while keeping performance values a vital component. GTI's source of innovative glass products are easily applied in conjunction with it's line of X-treme Low-E products and other specialty glass products. Go with the ideal source of innovative glass products that ensures value, efficiency and performance.

**INCREASING THERMAL EFFICIENCY**  
WITH TINTED & REFLECTIVE APPLICATIONS

**AESTHETICS . PERFORMANCE . COMFORT**

Glaz-Tech's tinted glass products are heat absorbing that not only enhance the exterior appearance of a building but in addition raise the interior energy efficiency while reducing solar glare. Substantially re-radiating the solar energy that it absorbs to the exterior and can reduce energy costs. These hard-working products maximize energy efficiency, especially in regions where air conditioning costs outweigh heating costs.

**APPLICATIONS**

- Insulated Glass
- Entrances
- Storefronts
- Spandrel Glass
- Atriums
- Skylights
- Patio Doors
- Storm Doors
- Storm Windows
- Windows
