Beveled Mirror

for a Custom & Polished Designed Product

Glaz-Tech Industries provides additional fabrication features to customize the look of its glass and mirror products. The polished process of beveling the edges of the glass at an angle leaves mirror, along with other glass products, with a beautiful framed look. This popular design feature allows your mirror to have an attractive and elegant look and is recommended for bathrooms, bedrooms, entry ways, dining rooms and living rooms.

Availability

Glaz-Tech Industries and State-of-the-Art Technology can bevel the following sizes:
