

ShowerGuard®

Forever Beautiful

Glaz-Tech Industries offers a product that is resistant to damage from hard water, soap and humidity. Standard glass enclosures eventually get damaged and inevitably cause your enclosure to appear dirty. In time, cleaning agents and chemical reactions make the surface of your glass enclosure more strenuous to maintain clean. Glaz-Tech's added line of Guardian's ShowerGuard® prevents those unwanted features and adds durability and longevity to your shower enclosure. It's clear appearance and low maintenance makes for an ideal investment for a shower enclosure that's both durable and beautiful.

Standard Shower Door Glass

Guardian ShowerGuard® Coating

Certified Fabricator

Glaz-Tech Industries is a Certified Fabricator for Guardian's ShowerGuard® Shower Enclosures. Thickness availability may range from 1/2" (12mm), 3/8" (10mm) and 1/4" (6mm). Contact your local sales representative for Guardian ShowerGuard® availability in your area.

Shower Enclosure Clarity

The Difference is Here

Stop investing in various chemical coatings, applications and other means of maintaining your shower enclosure clean. With Guardian's ShowerGuard® line you eliminate having to spend precious dollar amounts on chemicals that will eventually wear off. The clarity and your enclosure's benefits lay with innovative glass applications. That difference is here with Glaz-Tech Industries and ShowerGuard®.

- ▶ Its surface is permanently sealed during manufacturing with a patented ion beam process.
- ▶ Unlike spray-on or wipe-on treatments that eventually wear off, the protection provided by ShowerGuard® glass is part of the glass itself, so it never needs to be reapplied.
- ▶ With just a minimal amount of cleaning, ShowerGuard® glass will stay beautiful for years to come.

Magnified ShowerGuard® glass after exposure to typical shower conditions.

Magnified standard shower glass showing corrosion after exposure to typical shower conditions.

ShowerGuard® Availability

Glaz-Tech Industries provides several alternatives for shower enclosures. Glaz-Tech provides custom sizes, holes & notches upon request and tempers all Guardian ShowerGuard® product.
